SUMMARY

Shopify Developer with over two years of experience on stores for international e-commerce brands such as Factor Form, Case-Mate and Organifi. I work on Liquid themes, custom apps, Shopify Functions and Checkout Extensions, as well as technical SEO and performance. I also build AI agents and automations with Python and n8n.

SKILLS

- **Shopify:** Liquid, Online Store 2.0, Shopify CLI, Shopify Functions, Checkout and Theme App Extensions, Metafields and Metaobjects, Storefront API, Admin API (GraphQL), App Development, Web Pixels, Recharge
- **Front-End:** JavaScript (ES6+), TypeScript, React, HTML5, CSS3, Responsive Design, Accessibility (WCAG)
- **Back-End & AI:** Node.js, Python, n8n, AI Agents, Process Automation, REST and GraphQL APIs, Git, GitHub
- **Optimization:** Performance (Core Web Vitals, PageSpeed/Lighthouse), Technical SEO, CRO
- **Languages:** Portuguese (native), English (intermediate)

WORK EXPERIENCE

E-SMART CAPITAIS — **Remote**
Shopify Developer — **Dec 2024 – Present**

- Build and maintain stores for different brands, working with their marketing and e-commerce teams on weekly releases.
- Built features with Shopify Functions and Extensions (automatic discounts, shipping rules and checkout customizations) that replaced paid apps.
- Work on store performance (Core Web Vitals, PageSpeed) and fix accessibility issues following WCAG guidelines.

FACTOR FORM — **Remote**
Shopify Developer — **Mar 2026 – Present**

- Own the store end to end: front-end, app development, technical SEO and analytics.
- Built a Shopify app that limits Recharge subscriptions to logged-in employees, validating the customer's email before showing the subscription option on the product page.
- Set up tracking pixels and custom events (Web Pixels / Customer Events) for the marketing team's conversion tracking.

ORGANIFI — **Remote – USA**
Shopify Developer — **Feb 2024 – Feb 2026**

- Built and customized theme sections and templates in Liquid and JavaScript from designers' layouts, responsive across mobile and desktop.
- Worked on SEO and CRO improvements for product and collection pages.
- Structured content with metaobjects so the marketing team could publish pages without a developer.

CASE-MATE — **Remote – USA**
Shopify Developer — **Feb 2024 – Feb 2026**

- Maintained and extended the theme for a store with a large catalog, keeping product and collection pages scalable.
- Found and fixed performance issues using Lighthouse and Chrome DevTools.
- Built solutions with metaobjects and Shopify APIs, such as product filters and auto-updating collection pages.

CAERN – Water and Sewage Company of Rio Grande do Norte — **Natal, RN (On-site)**
IT Intern — **Apr 2025 – Nov 2025**

- Worked with the development team to build and maintain full-stack features in internal systems.
- Started the team's AI automation work, building AI agents and automations with Python and n8n that turn operational data into reports.
- Mapped and automated manual team routines.

EDUCATION

Associate Degree in Systems Analysis and Development — **Expected Dec 2026**
Federal University of Rio Grande do Norte (UFRN) – Natal, RN
